

SyberWorks Learning Management Systems Partners with Focus Compliance & Validation Services to Provide FDA Computer Validation Training

Waltham, Massachusetts – January 7, 2010

SyberWorks Learning Management Systems today announced a marketing partnership with Focus Compliance & Validation Services, Inc, a privately held, FDA compliance and validation consulting company. Focus Compliance & Validation Services (Focus CVS) is devoted to offering regulatory compliance, validation, and process engineering services to the pharmaceutical, biotechnology, and medical device industry.

SyberWorks Learning Management Systems and Focus CVS are teaming together to provide a series of webinars on various topics in the FDA compliance and validation space. Dave Boggs, CEO of SyberWorks states, “We are very excited to work with Focus CVS to present this webinar series to compliance and validation professionals in regulated industries such as biotech, life sciences, pharmaceutical, medical device and others.”

This February, SyberWorks and Focus CVS will present their first webinar on FDA computer validation. The webinar will provide an overview of what is meant by computer validation. Participants in the webinar will learn the fundamentals of what computer systems require validation, when validation should be performed, who is responsible, how you validate a computer system and where to go for references and guidance. For more information on the webinar and to register, go to www.syberworks.com/syberworks-focuscvcs-webinar.htm.

About Focus Validation & Compliance Services, Inc.

Headquartered in Knoxville, TN, Focus Compliance & Validation Services, Inc. (www.focuscvcs.com) is dedicated to providing regulatory compliance, validation, and process engineering services to the pharmaceutical, biotechnology, and medical device industry. Focus CVS is an innovative solutions provider to the U.S. Food & Drug Administration (FDA) regulated industry.

Focus CVS delivers services and tools helping clients understand how to integrate good software-based engineering practices into their product-development methodologies for the purpose of FDA regulatory compliance.

Based on FDA and other regulatory agencies’ governance and guidance criteria and first-hand experience, Focus CVS defines applicable risk-based validation principles and best practices. These principles and best practices apply to processes that are used in, and the facilities and controls that are used for, Design, Manufacturing, Packaging, Labeling, Storage, Installation, Support, Servicing, and Retirement of regulated software-based products. Through integration of these principles, clients avoid and mitigate regulatory-agency scrutiny and comply with the Federal Food, Drug, and Cosmetic Act. For more information, visit www.focuscvcs.com.

The SyberWorks Learning Management System/Learning Content Management System

SyberWorks Training Center (STC) is a Web-based Learning Management System (LMS)/Learning Content Management System (LCMS) that provides complete solutions for managing and tracking all types of training at your organization — from e-Learning courses to traditional classroom training and self-paced study programs. The STC includes extensive testing and assessment tools, reporting, management, communication and collaboration tools, and quality control capabilities — all in one integrated database application that is highly scalable to precisely meet your organization's needs. The SyberWorks Training Center LMS/LCMS can be purchased as an enterprise license or hosted application.
