

Certified Tech Trainers Selects the SyberWorks Hosted e-Learning Solution

Waltham, Massachusetts – February 1, 2006

SyberWorks, a leader in custom e-Learning Solutions and the Learning Management System industry, announced today they were selected by Certified Tech Trainers, the leading information security consulting and training firm to host their data security training using the SyberWorks hosted e-Learning solution.

Allen Keele, President and Founder of Certified Tech Trainers, Inc. states:

“One of the biggest business challenges subject matter experts must face is how to grow their consulting and training practice. They and their team are finite and not scaleable because their expertise is unique and specific to their set of industry experience. Offering e-Learning/web-based training in one's area of expertise is a way to overcome this business obstacle. In addition, e-Learning has become an acceptable alternative and or important supplement to traditional classroom training.”

Keele says, “Developing and maintaining one's own home-grown learning management system can cost a lot of money and is very time intensive. As a technologist, it was clear to me that a hosted learning management system solution would take fewer resources to maintain and cost much less to manage.”

Keele continues, “I reviewed many hosted learning management systems and found the SyberWorks Hosted Learning Management System to be the best overall value in regards to the dollars spent and the functionality it provides. Their hosted LMS seemed to be the ideal one-stop-shop e-Learning tool, which provides learner management, tracking, e-Commerce, and any other functionality we would possibly need as we move forward with our online training program over the next few years. I found SyberWorks to be very responsive to our needs during the evaluation process and this has remained the case after purchase. SyberWorks promptly returned calls and has customized our hosted learning management system to address our specific needs very quickly throughout the process.”

Dave Boggs, CEO of SyberWorks, states, “The SyberWorks Hosted e-Learning Solution is a terrific, cost-effective solution for companies who want to keep their costs and resource expenditures to a minimum so they can focus on their core business activities. The SyberWorks Hosted e-Learning Solution's robust feature set is scalable, so as a company's training and support needs increase, the system is easily upgraded to meet their requirements.”
