

## SyberWorks signs Online Pesticide Training to provide recertification credits for pesticide applicators with the SyberWork's hosted e-Learning Solution

Waltham, Massachusetts – December 20, 2004

SyberWorks, a leader in custom e-Learning Solutions and the Learning Management System industry, announced today they have been selected by Online Pesticide Training, Inc., to provide recertification credits for pesticide applicators using the SyberWorks hosted e-Learning solution.

JoEllen Habel, Owner of Online Pesticide Training states:

*“We were really impressed with their hosted e-Learning solution and the speed at which they returned our calls and inquiries. They were very easy to work with... Bob Goldschneider and the SyberWorks team spent extra time with us to customize our online training delivery system. They seemed to immediately understand our business model and quickly developed their technology to fit our roll-out strategy.”*

Dave Boggs, CEO of SyberWorks, states, *“SyberWorks is a client-intimate, custom e-Learning solutions company. We pride ourselves on understanding our customer’s business model so we can develop and deploy the right solution to meet their needs. We are committed to our customer’s success and offer training companies a hosted, web-based training solution that is a well-rounded offering of features and functionality for a moderate price.”*

[Bob Goldschneider](#), Director of Business Development, says, *“In many e-Learning implementations, the user interface of the Learning Management System is branded to look like the customer's web site or reflect their corporate image, seamlessly integrating into the company's overall online presence or an organization's intranet. Once the e-Learning campus has been set up, there are various pricing options for usage fees so a company has flexibility and latitude in selecting a usage fee schedule. It's a great program all around for organizations that want to outsource this part of their business model.”*

### About Pesticide Training & Consulting

Online Pesticide Training ([www.pesticidetraining.com](http://www.pesticidetraining.com)) is working with Pesticide Training and Consulting to provide comprehensive, informative classes that will bring the latest in pest control information to pesticide applicators in states across the country. Online Pesticide Training will provide a flexible, interactive online solution that will allow applicators to receive credits toward their state pesticide recertification requirements at their convenience.

The pesticide training can assist applicators with the safe and proper use of pesticides by providing information, tips, and techniques concerning pesticides and their use. This training also aids in an understanding of IPM (Integrated Pest Management) planning and implementation.

The course instructor, Reg Louey, has twenty-seven years of experience with the New York State Department of Environmental Conservation. Twenty of those years were spent working with the Bureau of Pesticide Regulation beginning with regulatory field inspections and then as a Regional Program Manager in which he had the responsibility of overseeing the pesticide program in his region for fourteen years. He is currently the owner, educator, and consultant for Pesticide Training and Consulting.

Pesticide Training and Consulting serves as a pesticide educational resource in the Northeast by offering pesticide training for certification and recertification for pesticide applicators.
