Pason Systems, Inc. Selects the SyberWorks Hosted Learning Management System to Provide Field Technician Testing

Waltham, Massachusetts – September 16, 2009

SyberWorks Inc., a leader in the Learning Management Systems (LMS) industry, announced today that they signed an agreement with Pason Systems, Inc. to provide field technician training.

Burton Heisley, Technical Analyst for Pason Systems, Inc., says, "Pason Systems, Inc. is the leading international provider of specialized rental oilfield instrumentation systems for use on land-based drilling and service rigs. Pason also offers data acquisition, wellsite reporting software, remote communications, and Internet information management tools. A Canadian corporation, Pason has over 90% of the market share in Canada and over 50% in the US."

Heisley states:

> *"One of the most critical components of obtaining and maintaining a high market share in the rental oilfield instrumentation systems industry is providing top quality service to our customers. Pason invests a considerable amount of time and resources in training and educating our field technicians. We use many different methods of training such as e-learning, on-the-job-training (OJT), instructor-lead training and classroom training to prepare our technicians for work out the field and Pason employs an LMS to manage this program."*

Heisley continues, "It came time for us to renew the contract with our previous Learning Management Systems provider and the renewal cost was exhorbitnet. We were also unhappy with their back office customer support and lack of service, so we decided to shop for another LMS vendor. Pason chose the SyberWorks Hosted Learning Management System because it offers full learning management functionality for a little more than one-sixth the cost of our previous system."

The SyberWorks Learning Management System/Learning Content Management System

SyberWorks Training Center (STC) is a Web-based Learning Management System (LMS)/Learning Content Management System (LCMS) that provides complete solutions for managing and tracking all types of training at your organization — from e-Learning courses to traditional classroom training and self-paced study programs. The STC includes extensive testing and assessment tools, reporting, management, communication and collaboration tools, and
