

Vision Solutions Selects the SyberWorks Hosted Learning Management System to Provide Customer, Vendor, Partner Training

Waltham, Massachusetts – March 3, 2009

SyberWorks Inc., a leader in the Learning Management Systems industry, announced today that they signed an agreement with Vision Solutions, Inc. to manage customer, vendor, and partner training using the SyberWorks Hosted Learning Management System.

James Lettelleir, Education Manager for Vision Solutions, Inc., says, “Vision Solutions is the world's leading provider of high-availability, disaster-recovery, and data-management solutions for the IBM® ‘System I’ and ‘System p’ markets. An IBM Premier Business Partner, Vision Solutions also offers advanced cluster-, data-, and systems-management solutions, and provides support for IBM® i™, Windows®, and AIX® operating environments.

“We were using a homegrown solution, in conjunction with another 3rd party application, to manage our training. But we really needed a centralized solution that will scale as the needs of our customer, vendor, and partner training programs grow. We also needed a system that could efficiently track and manage classroom, online, and self-paced training. We charge for our training, so we wanted full e-Commerce functionality and a way to manage release updates. We also wanted the ability to manage certifications, so competency management capabilities were important to us as well.”

“We selected SyberWorks because their hosted LMS solution offered the functionality we needed at competitive price. The system has additional functionality built-in that we will be able to take advantage of as our training programs expand.”

Dave Boggs, CEO of SyberWorks, states, “Technology and other businesses that provide value-added services are using the SyberWorks Hosted LMS because training and support are critical to the proper use and performance of their products and services. Companies can realize significant savings in operational expenses and personnel costs by using a hosted learning management solution.”

About Vision Solutions, Inc.

Vision Solutions, Inc. is a leading global provider of high-availability, disaster-recovery, and data-management solutions for IBM® Power Systems.
