

SyberWorks LMS e-Learning Implementation Podcast #6: *Interview with Joanne Scouler, e-Learning Specialist for Telelogic, Inc.*

Waltham, Massachusetts –March 21, 2007

SyberWorks, a leader in custom e-Learning Solutions and the Learning Management System industry, today announces the next episode in their LMS e-Learning Implementation Podcast Series: “Interview with Joanne Scouler, e-Learning Specialist for Telelogic, Inc.”

Dave Boggs, CEO of SyberWorks, states:

“In this edition of the SyberWorks LMS e-Learning Implementation Podcast Series, Joanne Scouler discusses their use of the SyberWorks Hosted e-Learning Solution to offer online customer and vendor-support training. The podcast lets us look into a detailed instructional-design and content-development process, in a business-to-business technology company. It also offers ideas about using interactivity in online course development, for both customer and vendor-support training.”

Boggs continues, “I think it's a great portrait of how interactivity can make online courses more engaging for users, of how valuable customer feedback can be collected through automated surveying tools, and of how e-learning development is done with multiple authoring tools. The interview flies in the face of the notion that any single authoring tool can meet all online course-development needs.”
