

SyberWorks announces the launch of the Online Training Content Journal

Waltham, Massachusetts – November 17, 2005

SyberWorks, a leader in custom e-Learning Solutions and the Learning Management System industry, announced today that they have launched the [Online Training Content Journal blog](#).

Dave Boggs, CEO of SyberWorks, states:

“Back in June of this year, I started the [Boggs e-Learning Chronicle](#) so I could share my thoughts and insights on e-learning and learning management systems with our customers and partners.”

In the last month, I have realized that the area of online training content development in and of itself has a lot of information and new developments happening daily. Because there is such a widespread interest in this specific body of knowledge, I decided to start the [Online Training Content Journal](#) to fulfill this need.

Boggs says, “The [Online Training Content Journal](#) will cover best practices, techniques, and trends in online training development and e-learning instructional design. Sub-topics will include assessments, instructional design, interactivity, learning activities, standards/Section 508, semantic markup, tricks and tips for CSS, Flash, XHTML, usability, and more ”

Boggs continues, “The [Online Training Content Journal](#) will also be hosted by Dana Fine, Senior Instructional Designer and Al Lemieux, Senior e-Learning Developer at SyberWorks, Inc. Their insights and knowledge of online training content development will help us to provide deep and unique perspectives on today’s latest developments in custom online training content creation.”
