

The SyberWorks Learning Management System Product Suite introduces online question creation that requires no e-learning development knowledge

Waltham, Massachusetts – October 20, 2005

SyberWorks, a leader in custom e-Learning Solutions and the Learning Management System industry, announced today the introduction of online question creation that requires no e-Learning development knowledge for the SyberWorks Training Center Learning Management System.

Dave Boggs, CEO of SyberWorks, states:

“Online question creation is great for people who just want to go in and put up a fresh quiz or test. It’s simple to use and a training manager does not have to spend time learning course authoring software to make changes to a test.”

SyberWorks online question creation functionality allows you to quickly and easily compose questions over the Internet with no knowledge of HTML, Flash, or e-Learning development required. Question types include, true/false, fill-in-the-blank, item matching, single correct, and multiple correct with the information stored in the SyberWorks Training Center Learning Management System database.

About SyberWorks
